Thank you, Rob.

EPA has reviewed the revised FS Work Plan and has no additional comments. The conditional approval can be considered final as of February 2, 2015. Please post the final version to SharePoint.

Subject: 17-mile LPRSA FSWP

Stephanie:

The CPG is submitting the enclosed final Feasibility Study Work Plan (FS work plan) for the 17-mile LPRSA Remedial Investigation/Feasibility Study (RI/FS) to EPA. The FSWP was prepared pursuant to Section IX, paragraph 37.h of the AOC.

EPA provided conditional approval of the FSWP in your February 2 email to me, subject to incorporation of several modifications as specified in an attachment to that email. The attached final FS work plan incorporates all of Region 2's requested modifications. Additionally, the CPG provides the following responses to EPA's additional specific comments on the December 23, 2014 version of the FSWP:

- **Specific Comment No. 4 (status of the RAO/PRG Technical Memorandum):** The CPG will submit the RAO/PRG Technical Memorandum to Region 2 in accordance with the schedule provided in the final FS work plan, i.e., no later than 60 days following EPA's February 2, 2015 conditional approval of FSWP (on or before April 3, 2015).
- **Specific Comment No. 6 (data sets removed from Table 1-1):** The revised version of Table 1-1 is intended to summarize the primary data sets collected during the RI, early actions, and treatability studies that are anticipated to directly support the FS evaluations. Table 1-1 is not inclusive of all data used or considered in the 17-mile RI/FS. An inclusive summary of all data will be provided in the RI and FS. The data sets removed from Table 1-1 were collected prior to the start of the 17-mile RI and will be described in the comprehensive RI and FS summary data tables.

Please contact Bill Potter or me with any questions.

Thank you.

R/
Rob
